Callum Sharpe

Site Reliability Engineer | Automation and Monitoring

PROFESSIONAL PROFILE

Results-oriented Site Reliability Engineer with a passion for building and maintaining robust, scalable systems. Proven ability to automate infrastructure processes, implement comprehensive monitoring solutions, and ensure high availability for critical applications. Eager to contribute to a dynamic team and drive continuous improvement initiatives.

WORK EXPERIENCE

Site Reliability Engineer · SolTech Solutions BV

2023 - Present | Amsterdam, Netherlands

- Reduced system downtime by 25% through proactive infrastructure monitoring and automated incident response systems.
- Developed and implemented a comprehensive Kubernetes monitoring strategy using Prometheus and Grafana, resulting in a 15% decrease in incident resolution time.
- Automated routine infrastructure tasks using Go scripts, freeing up 10% of the DevOps team's time for more complex projects.

Junior Site Reliability Engineer · Innovate Europe Ltd.

2021 - 2023 | Amsterdam, Netherlands

- Successfully migrated 5 critical web applications to AWS, improving application performance by 10% and reducing infrastructure costs by 8%.
- Created and maintained comprehensive documentation for AWS infrastructure configurations, ensuring seamless onboarding for new team members.
- Collaborated with developers to implement CI/CD pipelines, reducing application deployment time by 20%.

EDUCATION

Bachelor of Science in Physics

University of Amsterdam | 2017 - 2021
